£5350

Optional extras are

1. A 3HP electric reverse system for £375
2. Limited slip differential for £350 - Full race plate type £625
3. Aluminium bulkhead kit consists of 7 pieces shaped to fit, 4 are permanently fixed to the car, 3 are easily removed for servicing for £500
4. Plug in wiring harness and modifications to std motorcycle loom for £300
5. Aluminium radiator header tank £80
6. Silicone hoses & radiator plumbing kit inc aluminium pipes clips etc for £200
7. Tubular front subframe, this is a direct replacement for any REAR WHEEL DRIVE Mini. It features inboard aluminium rose jointed shock absorbers adjustable for damping and ride height, these are operated with pushrods from the double wishbones. Both the top and bottom wishbones are fully rosejointed and adjustments to caster, toe and camber are easily achieved on the car. The subframe accepts Z Cars aluminium fuel tank and radiator and can be retro fitted to an existing bike engine kit. It utilizes the Mini steering rack*, uprights, wheel hubs etc and comes complete with a throttle pedal adapting lever fixed to the frame ready to accept your original throttle cable. Fully powder coated to our usual standard * which now mounts to the subframe which eliminates all bump steer etc £1220.00
8. Trickshifter Full power Gearshift also Blips throttle on way down the gears £520
9. Alloy Race tank for multiple downshift to suit Trickshifter £55.00
10. Gear Indicator £160
11. Power commander £220 – 08 Busa
12. Anti roll bars front / rear inc droplinks & mounts road spec £150
13. Anti roll bars front / rear adjustable race spec inc alloy drop links alloy mounts etc £310
